

# NGUYEN THI ANH THU

QA Engineer

 0368887329     nguyenthianhthu3108.work@gmail.com     31/08/2001  
 TP Hồ Chí Minh     linkedin.com/in/sherrythu/

Testing professional with **nearly 3 years** of experience in manual and automation testing across **web** and **mobile** applications, with strong hands-on experience in **API testing**, **BDD automation** and end-to-end test execution. **ISTQB Foundation certified**, proficient in collaborating with cross-functional teams to ensure product quality, stability and continuous improvement throughout the development lifecycle.

## ◆ EDUCATION

- ◆ 08/2019 - 12/2023 **Can Tho University**  
Bachelor - Computer Networks and Data Communication  
GPA: 3.71/4.00

## ◆ WORK EXPERIENCE

- ◆ 08/2025 - Now **QC Engineer**  
Designveloper (DSV)  
**Project:** Lumin Sign – E-signature & Contract Lifecycle Management  
**Domain:** Digital Signature / Document Workflow  
**Team:** ~20 members (Vietnam, New Zealand)  
**Responsibilities & Impact:**
  - **Performed functional regression and basic non-functional testing** to ensure features worked according to defined requirements and acceptance criteria.
  - **Created and executed test cases** with clear steps and expected results following existing test plans.
  - **Participated in requirement clarification backlog refinement and planning meetings** to understand system behavior and testing scope.
  - **Tested core document workflows** including **signing order permissions reminders**, **document publishing** and **lifecycle states**.
  - Executed **API testing** using **Postman** to validate **request response data error handling** and **service integration**.
  - Checked application logs and system behavior to **support developers in issue investigation** and **root cause identification**.
  - Executed manual and assisted **automation tests using Cypress** while learning **automation concepts and basic scripting**.
  - Logged tracked and verified defects using **JIRA** with clear reproduction steps logs and supporting evidence.
  - Worked with multiple environments to understand testing purposes and constraints.
  - **Assisted in test reporting test summaries** and **release readiness activities** under guidance.
- ◆ 02/2025 - 08/2025 **QC Engineer**  
M\_Service (MoMo)  
**Project:** CVS – Securities Trading Platform  
**Domain:** Fintech / Trading Systems  
**Responsibilities & Impact:**

- Executed functional and regression testing for securities trading features based on provided specifications and scenarios.
- Verified end-to-end trading workflows including onboarding stock buy sell orders fund allocation and payment processing.
- Performed API testing and basic data validation to ensure correctness of trading operations.
- Tested system behavior during market open and close periods under strict time-based constraints.
- Identified and reported functional issues edge cases and data inconsistencies using the defect management process.
- Collaborated with PO BA developers and QC teammates to align on requirements risks and testing expectations.
- Supported post-release verification and issue investigation based on observed system behavior.

◆ 09/2023 - 02/2025

### **QA Engineer**

KMS Technology

**Project:** Motor Vehicle Driver – LexisNexis

**Domain:** Vehicle & Driver Data Platform (Insurance & Legal Risk)

#### **Responsibilities & Impact:**

- Performed testing for a large-scale data platform used in insurance and legal decision-making, ensuring high data accuracy, consistency, and reliability.
- Designed and executed functional, integration, regression and error-handling tests aligned with agile delivery and evolving business rules.
- Built and maintained Karate BDD automation test suites, improving smoke and regression coverage and supporting scalable validation.
- Collaborated with cross-region teams (US, India, Vietnam) to clarify requirements, reduce ambiguity and improve system testability and validation strategies.
- Provided consistent quality visibility through test reports, metrics and detailed defect analysis to support release decisions.

◆ 05/2023 - 08/2023

### **QC Engineer**

TPS Software

**Project:** Vibe – Marketing Platform

#### **Responsibilities & Impact:**

- Conducted functional, regression, smoke, API and database testing.
- Built automation using Selenium and Cucumber.
- Collaborated with developers to verify fixes and improve release stability.
- Participated in grooming sessions, contributing feedback on quality risks and testability.

## **◆ SKILL**

◆ Core Skills

<b>BDD Automation</b> (2 years)	<b>REST API Testing</b> (2 years)	<b>Test Automation</b> (2 years)
<b>Testing Fundamentals &amp; Tools</b> (2 years)	<b>Testing Types &amp; Techniques</b> (2 years)	
<b>Javascript</b> (1 year)	<b>Cypress</b> (< 1 year)	<b>Karate</b> (< 1 year)

◆ Soft Skills

- Learning & Growth
- Communication & Collaboration
- Time Management
- Ownership & Professionalism

◆ FOREIGN LANGUAGE

---

English (Intermediate)

◆ CERTIFICATE

---

◆ 11/2025
